

# Усне множення круглих чисел на одноцифрове число

## Приєм укрупнення розрядних одиниць

Зразок

При множенні способом укрупнення розрядних одиниць потрібно замінити кругле число більш крупною розрядною одиницею (дес., сот.), виконати множення, а відповідь записати в одиницях.

$$230 \cdot 4 = 23 \text{ дес.} \cdot 4 = 92 \text{ дес.} = 920$$

$$3200 \cdot 6 = 32 \text{ сот.} \cdot 6 = 192 \text{ сот.} = 19200$$

$900 \cdot 5 = \square \square \square \square$

$610 \cdot 3 = \square \square \square \square$

$120 \cdot 4 = \square \square \square \square$

$150 \cdot 6 = \square \square \square \square$

$200 \cdot 9 = \square \square \square \square$

$310 \cdot 7 = \square \square \square \square$

$420 \cdot 9 = \square \square \square \square$

$650 \cdot 8 = \square \square \square \square$

$800 \cdot 4 = \square \square \square \square$

$250 \cdot 3 = \square \square \square \square$

$550 \cdot 2 = \square \square \square \square$

$630 \cdot 5 = \square \square \square \square$

$790 \cdot 6 = \square \square \square \square$

$930 \cdot 7 = \square \square \square \square$

$320 \cdot 3 = \square \square \square \square$

$250 \cdot 3 = \square \square \square \square$

$340 \cdot 4 = \square \square \square \square$

$480 \cdot 5 = \square \square \square \square$

$560 \cdot 6 = \square \square \square \square$

$620 \cdot 7 = \square \square \square \square$

$790 \cdot 8 = \square \square \square \square$

$810 \cdot 9 = \square \square \square \square$

$900 \cdot 2 = \square \square \square \square$

$160 \cdot 3 = \square \square \square \square$

$270 \cdot 4 = \square \square \square \square$

$390 \cdot 5 = \square \square \square \square$

$470 \cdot 6 = \square \square \square \square$

$500 \cdot 7 = \square \square \square \square$

$620 \cdot 8 = \square \square \square \square$

$730 \cdot 9 = \square \square \square \square$

$800 \cdot 2 = \square \square \square \square$

$910 \cdot 3 = \square \square \square \square$

$180 \cdot 6 = \square \square \square \square$

$520 \cdot 4 = \square \square \square \square$

$610 \cdot 8 = \square \square \square \square$

$700 \cdot 2 = \square \square \square \square$

$130 \cdot 3 = \square \square \square \square$

$720 \cdot 4 = \square \square \square \square$

$170 \cdot 5 = \square \square \square \square$

$810 \cdot 7 = \square \square \square \square$

$520 \cdot 5 = \square \square \square \square$

$120 \cdot 2 = \square \square \square \square$

$220 \cdot 3 = \square \square \square \square$

$910 \cdot 5 = \square \square \square \square$

$140 \cdot 2 = \square \square \square \square$

$110 \cdot 4 = \square \square \square \square$

$900 \cdot 6 = \square \square \square \square$

$190 \cdot 4 = \square \square \square \square$

$220 \cdot 5 = \square \square \square \square$

$680 \cdot 2 = \square \square \square \square$

$730 \cdot 3 = \square \square \square \square$

$3400 \cdot 6 = \square \square \square \square \square$

$4200 \cdot 7 = \square \square \square \square \square$

$5300 \cdot 8 = \square \square \square \square \square$

$6100 \cdot 9 = \square \square \square \square \square$

$7500 \cdot 2 = \square \square \square \square \square$

$8200 \cdot 3 = \square \square \square \square \square$

$9600 \cdot 4 = \square \square \square \square \square$

$1200 \cdot 5 = \square \square \square \square \square$

$2300 \cdot 6 = \square \square \square \square \square$

$3600 \cdot 7 = \square \square \square \square \square$

$4500 \cdot 8 = \square \square \square \square \square$

$5700 \cdot 9 = \square \square \square \square \square$

$7654 + 5432$
